The innovation and impact agenda:
How to engage, energise and encourage researchers
to participate and benefit

if it doesn't
challenge
you
it doesn't
change
you

**Don't
wait for
luck.**

CAREERS SERVICE

www.ncl.ac.uk/careers

Successes:

Multidisciplinary interactions
Involvement of senior decision makers and influences –
rolled out this approach to other faculties
MRes –Bioscience Research Development and
Enterprise

Challenges:

Vocational career ambitions – relevance and need?
PI / Supervisor endorsement
Placed all over the city

CAREERS SERVICE

WHAT'S NEXT?

CAREERS SERVICE

www.ncl.ac.uk/careers

Commitment The extent to which the organisation is committed to enterprise education through strategy, systems, staff development and integrating enterprising behaviours into research and education processes.

Connectivity The extent to which the organisational units work together, how they connect to an overall strategy, and how cohesive these connections are.

Coproduction The extent of, and quality of, engagement with non academics to generate impactful and innovative research and meaningful effects by integrating enterprise education and behaviours.

Competencies The enterprising related skills and expertise within the institution, development of those skills across individuals and teams, and value placed on impact and innovation related specialisms.

Clarity How clearly staff within the institution understand enterprise education, how innovative capabilities extend beyond traditional expectations of academic research, and their role in creating enterprise education opportunities.

Adapted from **Creating real impact - developing competencies for impact literacy** - Julie Bayley, Alison Mitchell and Alanna Gluck, Vitae Conference, Sept 2018
